Set Route

1. Start a new route by entering your starting point or just click "my location", followed by your final destination.

2. Click "Next" to plan your route.

3.* To add a stop, just zoom in on the pause and click on the marker to get more information about it. Now click "Add" to add this stop to your route.

Gas

Food

Toilet

Restarea

4.* Do the same procedure at every pause the system plans for you.

You can see an overview of your planned stop in the list to the left.

Click "Start" to begin the route.

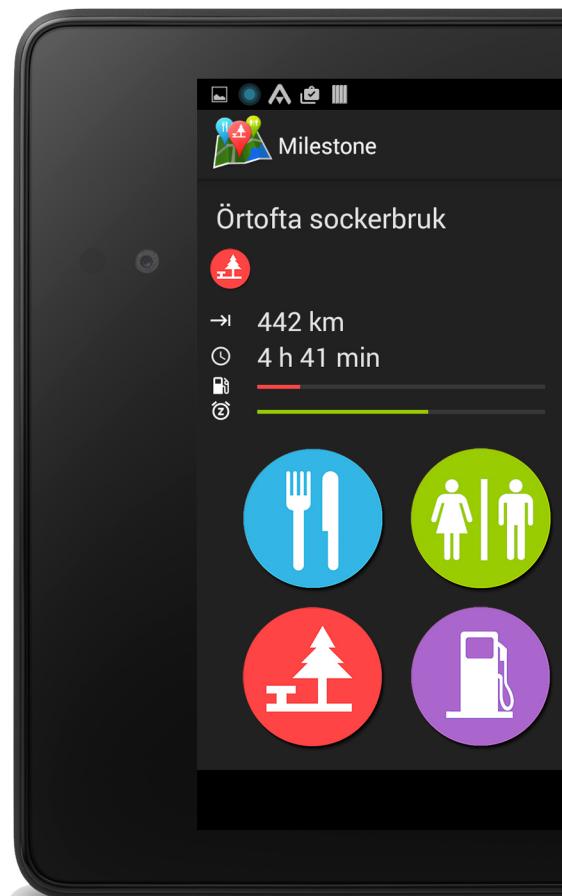

user manual

moving mode

In moving mode the User Interface is customized to be as simple as possible to minimize the time you have to take your eyes off the road.

Here you have 4 big & color-coded buttons for adding a milestone as you drive. You also have some useful information like the name of your next stop and the time & distance you have left to it.

The progressbars shows you the gas left in tank and a countdown when you have to stop and pause.

Add milestone

1. To add a milestone as you drive simply press one of the color-coded buttons based on what type of stop you would like.

2. You will now get a suggestion of a stop close to you. On the map you can see where the stop is. In the sidebar you get information about the stop. You can see the name, rating, a short description and what type of stop it is.

Click "Add" to add this stop and reroute. "Skip" will give a new suggestion.
